

Quality Products Since 1963

## UNITED ASPHALT QUICK-DRY PRIMER

### Description and Specs:

United Asphalt Quick-Dry Primer is a high solvent paint-like product made from select oxidized asphalts and petroleum distillates. It adheres well to a variety of surfaces and dries to the touch in hours. United Quick-Dry Primer is the obvious choice for roofers when time is of the essence and quality adhesion is a must. Meets ASTM D-41 and Federal Spec SS-A-701B. **(Asbestos Free)**

### Uses:

United Asphalt Quick-Dry Primer penetrates porous surfaces, creating a bondable substrate ensuring proper adhesion of subsequent coatings or asphalt roofing material. The surfaces it can be used on include masonry, brick, concrete, metal and gypsum. Priming asphalt surfaces prior to coating with aluminum coating has been found to increase the reflective intensity and extend performance of the aluminum.

### Method and Rate of Application:

Apply to a dry, dirt and oil free surface with a brush roller or spray gun. Asphalt, masonry and old built-up surfaces should be applied at a rate of at least 1 gallon per 100 sq. ft. Metal surfaces can be applied at 1/2 to 3/4 gallon per 100 sq. ft. Take notice to coat evenly and thoroughly to ensure an effective bond is obtained for overlay products.

### Safety:

**CAUTION! COMBUSTIBLE!** KEEP OUT OF REACH OF CHILDREN. Keep away from heat and flame. Do not heat container or store at temperatures greater the 110° F. Avoid breathing fumes and prolonged contact with skin.

**DANGER! HARMFUL OR FATAL IF SWALLOWED!** If **swallowed**, do not induce vomiting. CALL A PHYSICIAN IMMEDIATELY! When cleaning up, dispose of cans, rags and trowels in accordance with local laws. Keep container closed when not in use to avoid spills.

### Container Sizes:

5 gallon	42 lbs.
55 gallon	480 lbs.

### Clean-up:

Remove product from tools, etc., with kerosene or mineral spirits. Clean hands with a waterless hand cleaner.
